

Arma-Door
Series 80

TECHNICAL SPECIFICATION – STEEL HINGED DOORS

Door Leaf	<i>Structural Honeycomb Core</i> Constructed from twin formed 18g (1.2mm) zinc coated steel sheets, bonded with a structural honeycomb core giving solidity and strength to the panel. Available with a wide range of Vision Panels and ventilation louvres to suit your requirements.
Door Frame	<i>Zinc Coated Steel</i> Formed from 16g (1.6mm) zinc coated steel available in a wide range of profiles to suit on site conditions. Welded framer straps allow anchor bolt fixing to masonry or screw fixing to steel or timber. Available as single or double frames with the option of solid, glazed or louvered Over Panels and Side Panels.
Ironmongery	<i>Hardware Choices</i> Choose from an extensive range of hardware options including standard lock cases, panic exit devices, over-head door closers and external furniture. All factory fitted to ensure compatibility and functionality.
Finish	<i>BS or RAL Colour Ranges</i> Grey primer is applied as standard for on-site painting or choose from the standard BS or RAL colour ranges for a factory applied polyester power coat in various grades to suit internal, external or severe site conditions.
